AI Resume Analysis Report

Resume Analysis

Resume Score: 62/100

Missing Skills
* **Hard Skills:** Learning Management Systems (LMS like Canvas, Moodle, or Google Classroom), Content Management Systems (WordPress/CMS for magazine editing), Advanced Data/Research Tools (Zotero, Mendeley, SPSS), and SEO/Digital Writing basics.
* **Soft Skills:** Project Management, Stakeholder Management, Public Speaking, and Cross-functional Collaboration.
* **Digital Tools:** Proficiency in Microsoft Office Suite (advanced Word/Excel), Google Workspace, and AI tools for research (e.g., Notion, ChatGPT for drafting).

Strengths
* **Strong Academic Achievement:** Scoring 99.5 percentile in UGC NET is an exceptional accomplishment that establishes you as a subject-matter expert.
* **Consistency:** The trajectory of your academic performance (90.2% in Class XII, 8.3 CGPA in MA) demonstrates reliability and dedication.
* **Relevant Experience:** The Editor-in-Chief role and volunteering at National Seminars prove that you are active in the academic community, not just a passive student.
* **Clear Focus:** Your research dissertation ("From Gutenberg to the Digital Age") bridges traditional literature with modern technology, which is a highly relevant contemporary topic.

Weaknesses
* **Formatting/Layout:** The current text-based layout is fragmented. The headings are scattered, and the structure is non-traditional, which disrupts the flow of information.
* **Lack of Quantifiable Metrics:** You mention "led editorial planning" and "tutoring," but you don’t state how many students you taught, the number of issues published, or the growth in reach/engagement of the magazine.
* **Declaration/Personal Details:** In modern professional resumes, the "Declaration," full address, and date/place are considered outdated clutter.
* **Vague Skill Section:** "Digital Technical skills" is too broad. Specify exactly which software you use.

Suggestions
1. **Restructure for Readability:** Use a standard, clean, single-column chronological format. Ensure a clear hierarchy: Header -> Summary -> Education -> Experience -> Research/Skills.
2. **Quantify Results:**
* *Instead of:* "Led editorial planning."
* *Try:* "Managed an editorial team of [X] members to publish [X] issues, increasing departmental engagement by [X]%."
3. **Modernize the Summary:** Your objective is a bit "me-focused." Write a "Professional Summary" that highlights what you bring to an institution (e.g., "UGC NET qualified educator with a focus on modern literary theory and pedagogical innovation...").

4. **Remove Filler:** Delete the Declaration, full home address, and signature lines. Use that space to expand on your teaching methodologies or research findings.
5. **Use Action Verbs:** Start your bullets with strong verbs like *Designed, Analyzed, Facilitated, Spearheaded,* and *Coordinated*.

Career Roles
* Assistant Professor (Collegiate level)
* Content Developer / Curriculum Designer for EdTech firms
* Academic Editor / Publishing Assistant
* Research Assistant (University or Think Tank)
* Corporate Trainer (Communication and English Proficiency)

ATS Friendliness: Low to Moderate
* **Why:** The resume layout appears to be non-standard (the text blocks are disjointed). ATS (Applicant Tracking Systems) prefer standard top-to-bottom, left-to-right layouts with clear headers.
* **Formatting Issues:** The "scattered" placement of your header and sections will likely lead to "parsing errors," where an ATS might fail to correctly identify your contact info or work history.
* **Keyword Optimization:** You have good keywords (UGC NET, English Literature, Curriculum Design), but they need to be integrated into clear "Skills" and "Experience" bullet points to rank higher in searches.
* **Recommendation:** Move to a clean, professionally formatted PDF template (like those found in Google Docs or Canva—look for "Professional/Minimalist" styles) to ensure the ATS can read your data correctly.
